

MARMON RETAIL SOLUTIONS - BERKSHIRE HATHAWAY

70% lower emissions + 30% lower cost by remanufacturing your cart fleet

An Eco-Friendly & Economical Way to Improve Your Cart Fleet

Frequent use and exposure to the elements can cause damage to carts over time. And a rusty, worn cart can lead to a negative shopping experience and, in turn, lower sales. However, frequently replacing and repairing carts can get expensive and be wasteful. Luckily for retailers, there's a cost-effective option that not only lowers your carbon footprint, **it also extends the lifespan of your cart.**

Remanufactured cart solutions from Unarco™ Industries can give your current fleet new life by improving their performance and functionality. **Remanufactured carts maximize your investment for long-term savings.**

Environmental impacts by the numbers

Benefits of a remanufactured vs new cart

Up to 20 year
lifecycle extension

That's 5x longer than the
lifecycle of a cart without
remanufacturing

157-186 lbs less
carbon emissions per cart

That's equivalent to
emissions from driving
200 miles in a typical car

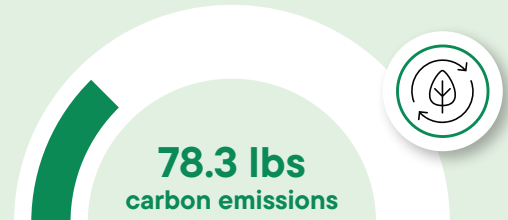

Up to 70% lower
lifecycle carbon emissions

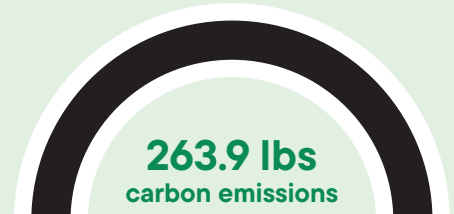

That means a dramatically
smaller carbon footprint
for your whole fleet

Remanufactured carts offer
**significantly less
carbon emissions**
with more cost savings
(less transport, production & materials)

Remanufactured Cart (90ZX in Danville, VA)

New Cart (90ZX)

This data was developed through a comparative **LCA** of the Unarco Industries 2023 90ZX completed by New Dominion Consulting, an independent third-party management consulting firm and Unarco Industries' preferred sustainability partner.

Our Remanufacturing Program Makes Old Carts Like New Again

The Unarco Industries 6-step remanufacturing process is eco-friendly, economical and environmentally responsible. **The average steel shopping cart can be remanufactured up to 4 times, increasing its lifespan by up to 5 years each time.**

Inspect & Tear Down

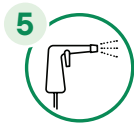

Strip to Bare Steel

Remove Rust Damage

Repair Structure

Apply New Powdercoat

Assemble Like-New Cart

In 2023 through the remanufacturing program, Unarco Industries saved carbon emissions equivalent to:

3,561

trips around the earth

4,521

homes' energy use for one year

38,206,467

pounds of coal burned

80,263

barrels of oil consumed
